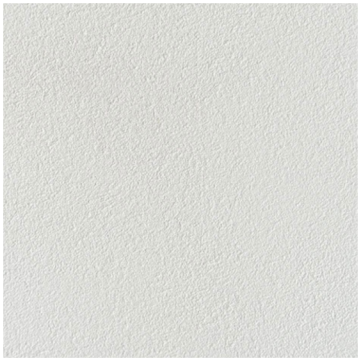
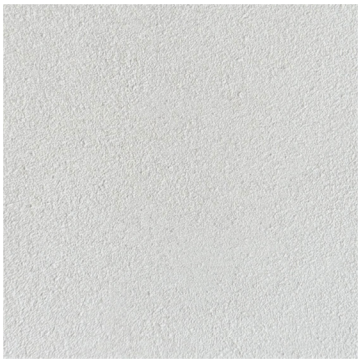
BASE COLOURS OF MR. CLAY MIXTURES

All decorative plasters come in base colours, and the dry mineral pigment is added separately to any mixture during the mixing process with water. The code shown below the sample indicates the pigment colour number.



White decorative clay plaster



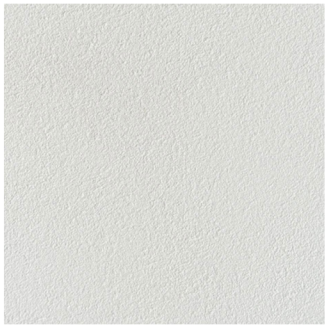
Decorative clay plaster LIGHT SAND 13

Brown decorative clay plaster

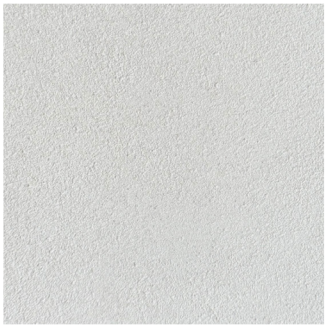
Decorative clay plaster "Svencelė"

Decorative clay - cement plaster ClayBeton

DECORATIVE CLAY PLASTER COLOUR PALETTE



White decorative clay plaster



Decorative clay plaster LIGHT SAND 13

The same colour palette is used for both mixtures, and the differences in shades are very minimal. Light Sand 13 plaster has a slightly coarser texture, allowing for more pronounced shadow effects. The white clay plaster is finer, producing softer shadows and allowing for a smoother, more polished finish.
